

AREA LIGHT

A stunning blend of performance, value and aesthetics, the **MPulse Area Light** is available in a wide range of lumen packages to address a variety of outdoor lighting needs. The Area Light can be combined with a full, architectural-grade LED family to create a total site solution for commercial, municipal, retail, education, and hospitality applications. Optional visual comfort optics distribute light through a non-pixelated light source that creates uniform, eye-pleasing illumination with minimal glare. The high-performance, IP66-rated luminaire delivers a minimum of 120 lumens per watt, providing significant energy savings while remaining durable in the field.

100W

150W & 200W

250W & 300W

DIMENSIONS: Please see pg. 4 for dimensional drawings.

100W-300W also available for wall mount applications, use QMP-KS mount

PERFORMANCE:

- Available in lumen packages ranging from 12,400lm to 38,400lm
- Calculated lumen maintenance value of > 90% (L90) at 100,000 hours calculated at 25°C
- 120-277V dimming standard. 347-480V options available
- 10KV surge suppression standard

OPTICS:

- Available in Type II, Type III, Type IV, and Type V optics

OPTIONS:

- NEMA 3-pin and 7-pin photocontrol receptacle
- High/Low/Off PIR fixture-integrated photo/motion sensor compatible with FSIR-100 remote control

FINISHES:

- Satin bronze and silver finish standard

CONTROLS:

Photo/Motion Sensor: The Wattstopper FSP-211 uses passive infrared (PIR) sensing technology to react to changes in infrared energy (i.e. moving body heat) within the coverage area. This slim, low-profile sensor is designed for installation inside the bottom of a light fixture body and is ideal for outdoor environments. The sensor operates at 120V/230V-240V and single phase 277V. The motion sensor is fully adjustable with dimmed light level options as well as on/off dusk to dawn control. Sensor can be combined with various lenses to operate at mounting heights from 8' to 40'. Factory settings can be adjusted via the FSIR-100, a wireless configuration tool. **Note that the sensor comes with photocell setting disabled and the FSIR-100 must be purchased if photocell functionality is desired.**

RPC, PR7 Options: Allow the use of 3rd party distributed intelligence controllers designed to connect to the fixture via our NEMA standard C136.41 3-, and 7-pin twist lock receptacle to provide dimming and On/Off control. Separate Photocontrol options are available, see page 2.

CONSTRUCTION:

- Die Cast Aluminum housing
- Tempered Glass
- 12" 18/3 cord standard

MOUNTING:

- Straight arm, trunnion swivel, and 2-3/8" slipfitter knuckle options available.

ENVIRONMENT:

- Listed for use in wet locations to UL standards and IP66 rated.

PHOTOMETRICS:

Please see page 6 for Iso-footcandle layouts. All IES files available online

WARRANTY:

10-year standard warranty with labor allowance* (further details available at www.maxlite.com/warranties)

*Warranty Limitations: Product must be rated for the application per the Product Data Sheet (PDS); operated ≤16 hrs/day; in ambient of -29°F to 104°F.

*Up to \$25/unit; labor allowances of up to \$500/unit available for purchase – contact MaxLite representative for details.
